

NEW! Online Pediatric CE Course

KEYtoCP™: A Systematic Treatment Model (Live Webinar series via Zoom)

Maximize neuroplasticity and minimize maladaptive habits in children and teens with Cerebral Palsy!

Developed by and taught by: Pia Stampe, PT, DPT

15 contact hours

Series of four 4-hour live webinars over 4 evenings

Dates: June 7, June 8, June 23 and June 24, 2021

Time: 6:00pm to 10:00pm Eastern Time

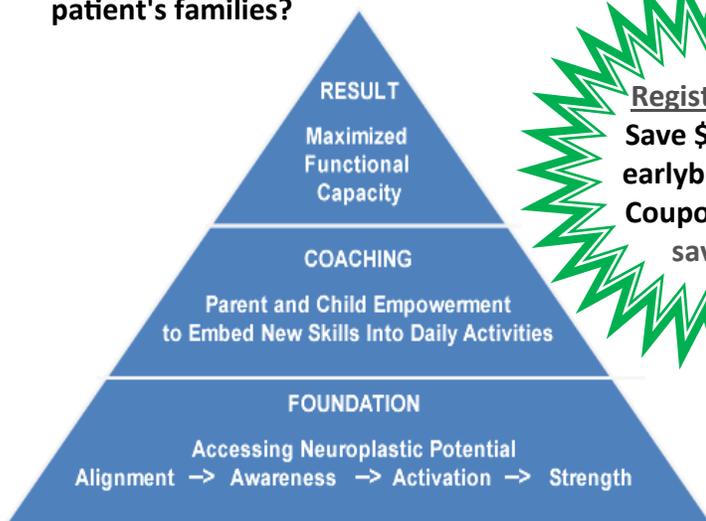

- Do you believe that the brain's amazing ability to heal and change can positively and significantly affect outcomes in all children with Cerebral Palsy?
- Do you know where to start and how to prioritize interventions for children with CP in order to ensure that they reach their highest possible potential?
- Are you ready to energize yourself and your patient's families?

Learn how to implement this comprehensive and completely **unique treatment experience for every client and their family.**

KEYtoCP™ — a highly systematic approach to the treatment of children with all types of cerebral palsy — jumpstarts change, addresses how to avoid formation of maladaptive habits, and changes maladaptive habits that have already developed. The KEYtoCP™ approach is firmly based on current brain research and knowledge about how to best harness the brain's ability to change. [More Details](#)

Check website for complete list of CE approvals.

Pia Stampe, PT, DPT is the owner and founder of KEYtoCP™. Pia is a pediatric physical therapist with more than 35 years of experience working with children with cerebral palsy. She graduated from PT education in Copenhagen, Denmark in 1981 and earned her Doctor of Physical Therapy degree from AT Still University in 2008. Pia has completed extensive continuing

education and has teaching experience in pediatrics/neurology, coaching and use of EMG biofeedback, neuromuscular stimulation and functional electrical stimulation. Pia worked closely with Karen Pape, MD as the systematic, intensive model used at KEYtoCP™ was developed.

What people are saying about this course...

- "Absolutely excellent. Many of the interventions I had heard of but never seen them used in such a thorough way."
- "Loved that we tackled a complex kiddo. Great reminder of balancing our "excitement" as therapists (to try many options to normalize alignment) with the day-to-day needs/wants of a family. Really appreciated the various points of view and multiple suggestions from all the participants."
- "Virtual demo brought it all together. It was really good."
- "You all did such a wonderful job at converting this course to a virtual format. I honestly don't think, from a participant's perspective, that it could have gone better. The presentations, videos, demos, breakout rooms all went so smoothly. Although virtual will never be as personal as live, the fact that "it can be done well" is so exciting - think about all of the education we could be able to access without having limits of cost for travel, accommodation etc. I find this very exciting! Thank you all so very much!!"
